international

fondator dr. Marian MIHAILA

JOURNAL of

- The Faculty of Economic and Administrative Sciences, Eftimie Murgu University Resita
- The Romanian Society for the Protection of Cultural Property
- The Association of European Recognized Experts Paris –AEXEA, France

The Journal appears four times a year in a printed version starting with the year 2003, in a bilingual version (Romanian language and the second language is an international language or that of the author's, if it is not an international recognized language).

The theme of the journal is oriented towards a segment defined by international law and by its branches, but also towards the domain of international relations, especially diversified during the last years.

The target groups are internal: state or private universities and local and central public institutions and authorities, which in a form or another work with international law or relations in their different shapes; international: universities, international organizations with a universal or specialized vocation; or regional: like non-funded organizations which develop activities in the domain of protection of cultural property.

Komitet Redakcyjny

Redaktor naczelny: prof. dr hab. med. Andrzej Steciwko

Zastępcy redaktora naczelnego:

dr n. med. Andrzej Staniszewski, dr n. med. Iwona Pirogowicz

Sekretarz redakcji: dr n. med. Donata Kurpas

Kwartalnik **FAMILY MEDICINE & PRIMARY CARE REVIEW** (dawniej: *Polska Medycyna Rodzinna*) jest recenzowanym czasopismem naukowym, adresowanym do osób zajmujących się badaniami naukowymi w dziedzinie medycyny rodzinnej, podstawowej opieki zdrowotnej oraz w dziedzinach pokrewnych, nauczycieli akademickich medycyny rodzinnej, lekarzy rodzinnych i innych osób pracujących w podstawowej opiece zdrowotnej, lekarzy w trakcie specjalizacji, rezydentów oraz studentów. Czasopismo przeznaczone jest także dla osób zajmujących się badaniami doświadczalnymi i epidemiologicznymi z zakresu innych dyscyplin medycznych.

Redakcja przyjmuje do druku prace w języku polskim i/lub angielskim (*UK English*). Publikowane są one w następujących działach kwartalnika:

- **Artykuły redakcyjne (Editorials);**
- **Prace pogładowe (Reviews);**
- **Prace oryginalne (Original papers)** – także doświadczalne;
- **Prace kazuistyczne (Case reports/studies)** – opisy przypadków dotyczące: a) nowej lub rzadkiej jednostki chorobowej, b) nowego rozumienia patogenezы, etiologii, diagnozy, przebiegu choroby lub terapii, c) nowego odkrycia dotyczącego znanej jednostki chorobowej;
- **Kształcenie przed-/podyplomowe (Under/postgraduate education) i ustawiczne (CME)** – m.in. programy kształcenia, specjalne opracowania dla celów dydaktycznych (np. programy edukacyjne);
- **Sprawozdania (Reports)** – ze zjazdów, kongresów i staży krajowych i zagranicznych itp.;
- **Listy do redakcji (Letters to the Editor)** – nadesłane w odpowiedzi na materiał publikowany w czasopiśmie, przedstawiające uwagi i/lub inny punkt widzenia;
- **Recenzje książek i przeglądy piśmiennictwa (Book/literature reviews); Komunikaty (Announcements); Varia**

Priorytet w druku mają prace oryginalne oraz publikacje w języku angielskim.

Kwartalnik został doceniony przez lekarzy rodzinnych, Ministerstwo Zdrowia, CMKP oraz konsultanta krajowego w dziedzinie medycyny rodzinnej – **czasopismo znajduje się w wykazie lektur obowiązujących do egzaminu specjalizacyjnego z medycyny rodzinnej.**

Naszą **misją** jest stworzenie platformy współpracy oraz wymiany informacji, myśli i doświadczeń z zakresu medycyny rodzinnej i podstawowej opieki zdrowotnej, która obejmowałaby Europę Środkową i Wschodnią. W regionie tym nie ma bowiem podobnego czasopisma konsolidującego środowiska naukowe i zawodowe w tych dziedzinach.

Kwartalnik jest indeksowany przez EMBASE/Excerpta Medica, Index Copernicus: 6,07 pkt. oraz MNiSzW: 4 pkt.

Chcielibyśmy także zaistnieć w innych międzynarodowych bazach piśmiennictwa biomedycznego, takich jak:

Index Medicus, PubMed/MEDLINE czy Current Contents.

Informacje o prenumeracie: koszt prenumeraty rocznej – 60 zł; dla członków PTMR prenumerata w opłacie składki.

IndexCopernicus™ Evaluation Methodology 2009	7
Journals Indexed and Evaluated	9
Publishers	215

IndexCopernicus™ Evaluation Methodology 2009

Stage 1. Detailed Parametrical analysis

Following groups of parameters are being evaluated:

– Scientific quality	580 base points	(58.0%)
– Editorial quality	200 base points	(20.0%)
– International availability	135 base points	(13.5%)
– Frequency-Regularity-Stability	50 base points	(5.0%)
– Technical quality	35 base points	(3.5%)
Total	1000 base points	(100.0%)

Stage 2. Negative score analysis

Negative score is given for:

- irregular or late issuance [late up to one publishing period (-30), joint issues (-50), late more than one publishing period (-60)];
- non-ethical advertisement placement [within article (-60), directly before/after article (-40)].

Stage 3. Experts peer-review

Experts peer-review of evaluated journals change the total score by ± 60 points (12%):

- Scientific significance of the published material [± 20],
- Up-to-date content [± 20],
- Educational value [± 20].

How do we calculate Index Copernicus Value (ICV)

First, Base Points (BP) are converted into 10 points Total Basic Score (TBS), then:

- A) For journals indexed in Thomson Scientific Index Copernicus Value (ICV) is being calculated based on the following formula:

$$9 + [(TBS) \times (IF)] \text{ (where IF = impact factor value).}$$

This formula ensure that the journals indexed at Thomson Scientific have minimum ICV=9 points.

- B) For the rest of journals which are NOT indexed in Thomson Scientific **TBS=ICV**

I. Scientific Quality

The following parameters have been evaluated:

- International indexation. Three levels of indexation has been defined:
 - Basic level – indexation in international bibliographic databases EXCEPT Index Medicus/MEDLINE and Current Contents.
 - MEDLINE level (indexation at Index Medicus/MEDLINE). The score can be lowered if a journal does not deliver or is late with delivering XML files according to Medline requirements.
 - Indexation at Philadelphia Institute of Scientific Information's Master Journal List (based on impact factor). IF is used in the calculation algorithm of Index Copernicus Value (ICV) – see above.
- Annual percent of original research papers*

Original research paper is that, which presents results of empiric investigation (clinical or laboratory), which is divided into the following sections: background, material and methods, results, discussion, conclusions, references. The percentage of this original works published in a journal reflects its character (scientific or educational) and indicates the potential interest of researchers in publishing there.

- Number of papers published annually from centers outside the journal's country of origin*

Indirectly indicates a degree of journal's acceptance on international market. The more international publications – the higher the score.

- Number of all papers published on annual basis*

Reflects potential authorship and acceptance for the journal. Only papers published in regular issues are being considered. Papers published in special issues or supplements are not being counted as they are considered not to undergo the regular peer-review process. It is also being assessed if the papers published

in a journal come from a source associated with publisher or editorial board only, what lowers the IC score.
5. *International Editorial Board* adds to the score, for it creates a chance for further journal's development.

II. Editorial quality

1. Cover page [all the following items should appear clearly: journal's title, ISSN, frequency, volume/issue/part number, month/year].
2. The uniform composition of presented manuscripts compatible to journal's instructions for authors, forms the leading element of editorial quality. The following parameters are being evaluated:
 - a. Summary should count 200–250 words and have structural form, i.e. reflect structure of an article (background, material and methods, results, conclusion). Non-structural summaries counting less than 200 words lower the score.
 - b. Key words should not repeat the title of manuscript. The most desirable is to use key words from the MeSH catalogue.
 - c. Uniform presentation of original manuscripts. Research works should be divided to background, material and methods, results, discussion, conclusions, references.
 - d. References should be presented in consecutive order (as they are cited in the text). First six authors should be presented. Journal title abbreviations should be in Medline standard. Arab numbers in bracket or in upper index should mark citations in the text. Each citation item should be placed in a separate paragraph.

Alphabetical order, "en block" presentation or incorrect abbreviation of journals title lowers the score.

3. Information for authors should be included into each journal's issue, and should contain:
General rules of manuscripts evaluation process, disclosing conflicts of interest between referee-author, referee-research sponsor, author-research sponsor, patient's privacy rights and ethical issues in animal and clinical research (Editorial Policy).
4. Detailed editorial and technical information regarding manuscript preparation (Instruction for Authors)
5. Editorial information should include list of Editorial Board members, editorial correspondence address, name and address of a publisher, ISSN and frequency of issuance (monthly, quarterly)
6. Advertisements should be placed on editorial pages (at the beginning and/or at the end of a journal).
Advertisement within scientific content, i.e. before, inside and directly after an article is undesirable and lower the IC score.

III. International availability

International availability is important for proper development of a scientific journal. Two factors are taken into consideration:

1. Language of publication. English is preferable, since this is the universal language of science. Journals published in other languages should have full size (200–250 words) structural summaries in English and bilingual article title as well as table/figure subtitles.
2. Internet availability. Internet becomes an important medium for scientific publication and exchange of professional information. It is due to its global availability and speed and low cost of publication, comparing to printed journals. Internet availability enhances a chance to broaden journal's circulation and speeds up its development. The access to editorial information, table of contents, summaries and full text articles and search tools are evaluated. The preferred language of a Website is English.

IV. Frequency-Regularity-Market stability

This group of parameters is to assess the editor's publishing/managing efficiency. We evaluate:

1. Regularity of issuance, which is an important factor for journal's stability and one of the key evaluation parameter at other international indexing databases such as Medline and Current Contents. Journals of an irregular issuance, late, or those, which issue joint issues, receive a lower score.
2. We add score to journals depending on their continuous presence on the market.

V. Technical quality

Technical quality discloses the ability for proper presentation of the scientific content. The quality of pre-print process, especially desk top publishing (DTP), ability to print in color, and the quality of paper (acid-free is preferred) are evaluated. The A4 format of a journal is preferred.

SCIENCE GOES DIGITAL!

Is your journal not available on the Internet?
You have archive of your journal only in hard copies?

Go for Google FREE Digitization!
It is absolutely free of charge and your journal will also take advantage of the opportunities of the indexation in Index Copernicus.

The purpose of the Google free digitization project is to convert printed scientific publications into electronic files. Electronic files are easier to manage and their appearance on the internet will allow wider range of readers to find your journal. This way it is promoted on the global scale and is more likely to be cited. Thanks to the Google platform scientific achievements will become part of the World heritage and will be easily accessible.

Promote your journal. Make it digital.

Editor Emeritus
Vladimir Beliș

Published on behalf of the
**Romanian Society of
Legal Medicine**

The **Romanian Journal of Legal Medicine (RJLM)** is the leading Eastern European peer-reviewed journal dedicated to publishing of original investigations, observations, scholarly inquiries and reviews in the various branches of the forensic sciences.

RJLM continues a long standing tradition which began in 1936, when Nicolae Minovici (1868-1941) founded the Romanian Legal Medicine Association and published the *Journal of Legal Medicine* which can be considered the first forensic periodical of academic quality in Eastern Europe, Romania.

The editorial policy encourages prompt publication of papers, within less than 3 months on the average after submission of manuscript.

Our website (www.rjlm.ro) serves as your source of information for all aspects of the journal, including article archives, contacting the staff, inquiring about peer review in the journal, and subscriptions.

*The **Romanian Journal of Legal Medicine** is well into its 18th year, and I'm pleased to say that we are looking forward to exciting developments that should make the next decade in forensic sciences just as momentous as the last!*

Editor, *Dan Dermengiu*
